

FedRAMP IaaS & PaaS Cloud Solutions JAB P-ATO (Moderate) and FISMA HIGH GovPoint® Cloud Services for the Federal Government

If you need to obtain a Federal Authority to Operate (ATO) cloud to host workloads with specific performance, privacy or compliance requirements; need a FedRAMP Hybrid cloud environment; or need to use your own hardware, we can help.

MIS Sciences is NOT a reseller, we own and operate the GovPoint FedRAMP infrastructures which are housed at high security datacenters in Los Angeles and Las Vegas, providing extra flexibility to meet your specialized needs with custom configurations or hardware.

If your need is Hybrid, Disaster Recovery, Compute, Data Storage and Backup, Docker, Incident Response Management, Security Services, Virtual Datacenter, or ~~bring~~ your own hardware, +we can help. Your applications, data, and workloads will be in a FISMA High FedRAMP compliant infrastructure.

This readily scalable, on-demand service gives you the flexibility and control to meet fast-changing workloads, while maintaining compliance and security.

Key benefits:

- Up to 30% less than AWS
- Fixed pricing. No access, I/O, transfer charges. No hidden charges
- IR response team
- Fast deployment, self-service access and metered billing
- On-demand computing capacity scalability
- FISMA High for sensitive data
- Flexible provisioning as either private or multi-tenant cloud
- Seamless integration with on-premises infrastructure to create a secure, hybrid cloud
- Flexible storage options
- 24x7 Technical support

FedRAMP/ATO-compliant multi-tenant cloud environment

Flexible provisioning

- ~ Private/single/dedicated cloud
- ~ Community/multi-tenant cloud

Security and compliance

- ~ Provides more than 275 NIST 800-53 security controls supporting federal ATOs
- ~ Includes DoD Impact Level 2 Provisional authorization

FedRAMP compliant dedicated private cloud environment

- ~ Hosts production/development applications and databases with specific performance, data privacy or compliance requirements
- ~ Meets FISMA High and FedRAMP Moderate security standards
- ~ Allows you to become a cloud service provider for multiple sub-agencies or other organizations

Offer	Description
FedRAMP-compliant cloud	<p>A FedRAMP-grade multi-tenant cloud designed for government agencies needing to move FedRAMP and FISMA workloads seamlessly to a federally compliant and secure cloud environment. Solution highlights:</p> <ul style="list-style-type: none"> • Mainframe support • Built to federal NIST 800-53 and Department of Defense 8500 standards with more than 275 security controls, ensuring your data and services are always secure and isolated • Features rapid deployment, on-demand scalability, self-service access and a consumption-based usage model • Allows flexible provisioning as either a private/single/dedicated cloud or as a community/multi-tenant cloud • Hosted at either an MIS Sciences data center or your designated site • Reduces operating expenses significantly, as data center space, power and cooling costs are managed by MIS Sciences • Built on MIS Sciences core technology - allowing seamless integration, interconnect capability and consistency across multiple cloud environments • Includes 24x7 monitoring • Includes FISMA HIGH and DoD Impact Level 2 Provisional authorization
Data storage, protection and management	<p>Our dedicated FISMA HIGH cloud solution includes the same features and functionality as our multi-tenant (FedRAMP) cloud, with the additional peace of mind that comes with an isolated/dedicated infrastructure. Solution highlights:</p> <ul style="list-style-type: none"> • Provides the foundation for physical separation and isolation of the entire cloud infrastructure, allowing greater customized architecture options than typically found in multi-tenant commodity cloud service providers. • Meets performance and federal security requirements for sensitive workloads. • Provides security standards that meet FISMA Low, Moderate, and High requirements. • Integrates seamlessly with your on-premises infrastructure to create a secure, hybrid cloud. • Allows you to become a cloud provider. The flexibility of the architecture enables a single agency to host cloud services for multiple sub agencies or other organizations with common interests.

Some of the GovPoint Features

- Support for Docker Containers
- Easily import your VMware images
- Single pane of glass provisioning
- Private VLAN to your data center
- Full real-time data synchronization for minimal DR (option)
- Private data circuits
- IPv6 support
- High capacity . long term storage
- Detailed billing and usage reports
- Multi-edge CDN support
- Continuous vulnerability scanning for your applications (optional)
- FISMA High
- Fixed price . no hidden or usage charges

We can help you:

- Access temporary capacity for short-term application testing and development
- Burst from private to multi-tenant cloud for handling capacity hikes
- Meet seasonal/cyclical demands with on-demand capacity scaling
- Run high-performance computing applications or batch processing
- Create an offsite disaster recovery environment
- Move critical applications safely to a secure cloud environment
- Gain flexibility to align cost with usage to avoid overutilization and underutilization provisioning
